

Very brief brief!

- Select 10 large images (at least 450 pixels square) either of your own choice or from one or more of the sample sites provided.

- Create thumbnails for each image of a suitable size for an index page.
- Make an 11-page album to feature them. On the home page the 10 thumbnails should be neatly displayed, centrally on screen. Clicking any thumbnail should produce a new page with the larger image.

A simple description of the image and a link to the home page should be on each large image page.

Choose a suitable background and theme for the pages.

Check that it all works OK and print the home page and a sample larger image page.

- Make a link to the gallery on another web site. Test that it works.
